Sinus Clinic

Why a sinus clinic?

Our sinus clinic was established to help children with sinus problems and their families find and treat the root causes of their sinus issues.

Who will benefit?

The sinus clinic will see any patient whose sinus disease is causing problems on an on-going basis.

Sinus disease may reflect the result of the following among other causes:

- Infection.
- Environment.
- Allergy.
- Irritants.
- Anatomic anomalies.
- Metabolic disease.
- Hypersensitivity reactions.

Under one roof

The sinus clinic enables children with sinus problems to be **evaluated for all these entities at one time**. The multi-disciplinary approach saves time, discomfort and cost.

When visiting our sinus clinic, the process generally includes the following which takes place in one location:

- A physical exam and discussion of medical history.
- Allergy testing.
- An examination of the nasal passages, upper airway, voice box and vocal cords.
- Lung function tests.
- Imaging studies, including X-rays, MRI or CT.
- Lab tests.
