

## Pediatric Rounds CME quiz

You must answer all questions and complete all registration information. To receive *AMA PRA Category 1 Credit™*, you must score at least 75 percent. Unanswered questions are counted as incorrect. Circle the correct answer(s).

### Cochlear implants

1. At what age of implantation does a child deafened before 1 year old have the best chance for normal auditory skill development?
  - a. 3.5 years.
  - b. 2 years.
  - c. 6 years.
2. What is the lower age limit for a cochlear implant evaluation?
  - a. 1 year.
  - b. 6 months.
  - c. There is no lower age limit.
3. An example of an auditory skill that depends on bilateral cochlear implantation is:
  - a. Recognizing speech in noise.
  - b. Sound source localization.
  - c. Both a and b.

### Bladder exstrophy

1. The exstrophy complex is unique in that the least severe form, epispadias, is not the most common form of the malformation.
  - a. True
  - b. False
2. Classic exstrophy of the bladder includes abnormality of the bladder, urethra, genitalia and pelvis.
  - a. True
  - b. False
3. Girls with the least severe form of exstrophy, epispadias, are detected later in life because of sexual dysfunction.
  - a. True
  - b. False
4. Complete repair of exstrophy is felt to have an advantage over staged closure because it promotes bladder

growth and development.

- a. True
- b. False

### Von Willebrand

1. Diagnosis of von Willebrand disease (VWD) requires a prolonged PTT.
  - a. True
  - b. False
2. In Type 2B VWD, von Willebrand factor has which of the following?
  - a. Abnormal collagen binding.
  - b. Abnormal factor VIII binding.
  - c. Increased binding to platelets.
  - d. Decreased binding to platelets.
3. Common presenting symptoms of Type 1 VWD include all of the following except:
  - a. Epistaxis.
  - b. Joint bleeding.
  - c. Menorrhagia.
  - d. Hematomas.

### Eosinophilic esophagitis

1. Eosinophilic esophagitis (EE):
  - a. Is characterized by symptoms that mimic GERD.
  - b. Should be considered when GERD symptoms fail to respond to acid suppression therapy.
  - c. Is associated with other atopic symptoms such as allergic rhinitis.
  - d. Must be excluded in children and adolescents presenting with food impaction.
  - e. All of the above.
2. EE can be diagnosed by:
  - a. History and physical exam alone.
  - b. Lack of response to acid suppression therapy in children with GERD symptoms.
  - c. Characteristic endoscopic and histologic findings.
  - d. Upper gastrointestinal radiography (barium swallow).
  - e. None of the above.
3. Treatment of EE involves all the following except:

- a. Coordination of care between the gastroenterologist, allergist/immunologist and dietitian.
- b. High-dose acid suppression therapy.
- c. Swallowed glucocorticoid therapy.
- d. Elimination diet therapy.
- e. The effects of therapy wane upon discontinuation.

### Evaluation of activity

1. This program (check all that apply):
  - Met stated objectives.
  - Will improve my ability to provide excellent patient care.
  - Is relevant to my practice of medicine.
  - Was free of commercial bias.
2. Please recommend topics for future educational program planning:
