

Manual Resuscitator Bag

Purpose

The manual resuscitator bag is used to give your child extra breaths.

Use the bag after suctioning or whenever your child needs help to breathe.

The resuscitator bag also includes a mask. The mask has to cover both the mouth and nose. The mask size needs to be changed as your child grows.

Resuscitator Bag

Using the bag

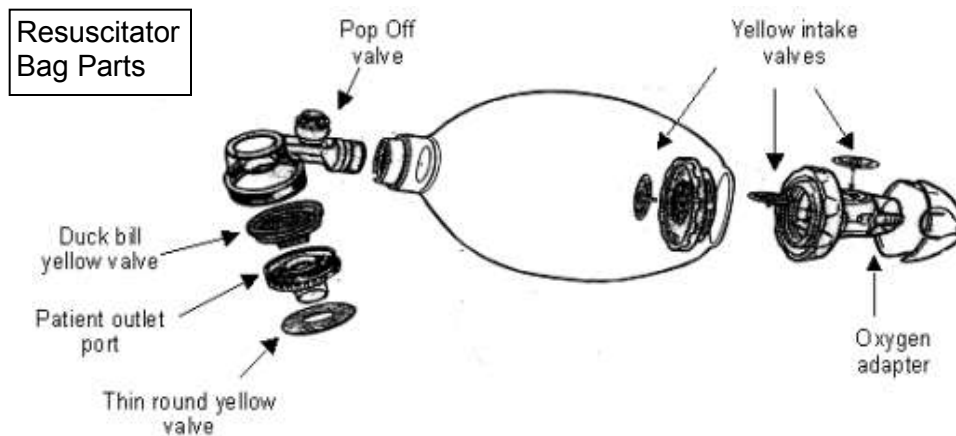

1. Connect the bag to the tracheostomy tube.

If your child	Then
breathes on his or her own	Squeeze the resuscitator bag as soon as your child begins to breath in.
does not breathe on his or her own	Squeeze the bag at the same rate as the ventilator.

2. As you squeeze the bag, watch your child's chest rise.
3. As soon as your child's chest rises, release the bag.
4. Repeat this cycle of squeezing and releasing until your child is back to their baseline.

If your child	Then
has oxygen ordered	Use it when hand ventilating your child at the flow of 3 to 5 liters per minute.
does not have oxygen ordered	Keep your child on room air.

Cleaning the bag

1. Once a week, take the bag apart.
2. Wash all parts in warm soapy water.
3. Disinfect all parts using a mixture of vinegar and tap water. (3 quarts Vinegar to 1 gallon of water)
4. Rinse all parts well with tap water.
5. Let all parts air dry completely.
6. Put the bag back together. (Use the diagram to the right)
7. Check to make sure the bag works correctly by blocking the patient outlet port (the part that connects to the trach tube). On the child-size bag, hold down the pop-off valve.
8. Squeeze the bag.

If the bag	Then
deflates	Check that all connections are tight. Be sure the yellow washers are laying flat and do not have holes.
does not deflate	The bag has been put back together correctly.

Special directions

- Always have the bag in the same room as your child.
- Always keep a back-up resuscitator bag in your GO BAG.
- Be sure one resuscitator bag is with your child when the other bag is being cleaned.
- If any of the washers have holes or are torn, call your home care provider.

ALERT: Call your child's doctor, nurse, or clinic if you have any questions or concerns or if your child has special health care needs that were not covered by this information.
