Investing in our future

Children's Hospital of Wisconsin

Kids deserve the best.
2012 Highlights
Investing in a brighter future for children

Children’s Hospital of Wisconsin made remarkable strides in 2012. We continued to move forward with our strategic plan, which calls for developing truly unique national programs, becoming the Midwest’s leading pediatric health provider and improving the health of Wisconsin children.

Our children are our most valuable resource, and we devote every day to doing what is best for their health and wellbeing – today and for the future. With that in mind, we are proud to share some of the year’s highlights made possible by your generosity and support.
In 2012, Children’s Hospital of Wisconsin:

**Went live with Epic,** a state-of-the-art electronic health record system that enables more seamless integration of care across specialties and locations for our patients and families, powerful data collection and better measurement that improves outcomes for children.

**Opened the Genomic Medicine Clinic,** bringing whole genome sequencing to more children with complex genetic issues.

- **Performed a rare and successful heart/liver transplant on a 15-year-old boy with complex congenital heart disease and liver failure,** which was the first in Wisconsin and only the tenth performed on a child in the United States.

- **Achieved second in the nation for the number of pediatric heart transplants (23)** performed at Herma Heart Center.

- **Was recognized as a Phase 1 Center for early phase clinical trials by Children’s Oncology Group,** The MACC Fund Center for Cancer and Blood Disorders is one of only 21 centers in the world with this certification.
Our Vision is that Wisconsin’s kids will be the healthiest in the nation.
Our Vision is that Wisconsin's kids will be the healthiest in the nation.
Highlights

In 2012, Children’s Hospital of Wisconsin:

Partnered with ThedaCare and Affinity Health System to establish an unprecedented child mental health partnership in Fox Valley. Catalpa Health opened in fall to meet the underserved mental health needs of kids and teens in the region.

- Received a $2.8 million grant from the Center for Medicare and Medicaid Innovation for a pilot program with Children’s Community Health Plan members to reduce health care costs and improve quality of care.
- Appointed Robert Lane, MD, pediatrician-in-chief of Children’s Hospital of Wisconsin and the David J. and Barri L. Drury Chair in Pediatrics. He is chairman of the Department of Pediatrics at the Medical College of Wisconsin. Dr. Lane came to Wisconsin from the University of Utah School of Medicine.
- Performed the state’s first pediatric robot-assisted laparoscopic surgery at a pediatric hospital. Children’s Hospital pediatric urology surgeons now use this technology to treat a variety of conditions previously only repairable with open surgery.

Was designated a Level 4 Epilepsy Center, providing the highest level of medical and surgical evaluation and treatment for complex epilepsy, and the only Level 4 pediatric epilepsy program in Wisconsin.

Through your commitments of time, talent and dollars, we are saving lives, treating and curing disease, and making our community stronger.
In 2012, Children’s Hospital of Wisconsin:

- Expanded Child Advocacy Services in North-Central Wisconsin. Child Advocacy Center staff in Wausau provides assessments, protection and support for children who may have been victims of crime. The center achieved accreditation — the highest level of service excellence awarded by the National Children’s Alliance.

- Created a new division, Population Health Management and Payment Innovation, to focus efforts to improve the health of children, lower the cost of care, develop new payment models and enhance the patient and client experience.

- Worked with a coalition of Wisconsin stakeholders to educate parents, coaches and legislators about the importance of concussion legislation, resulting in the successful passage of a law that protects young athletes and require education for players, coaches and parents about concussions.

- Cared for more than 720 infants last year in the Neonatal Intensive Care Unit - the most in Children’s Hospital’s NICU history. Added Twin-to-twin Tranfusion Syndrome laser ablation to the scope of fetal interventions offered.

We thank you for your passionate and ongoing support of our mission to help our kids become the healthiest in the nation.
Our Patients

Finn’s story: Nurturing the tiniest patients

Amy Hettinger developed severe preeclampsia at 26 weeks of pregnancy. Baby Finn was delivered prematurely via emergency Cesarean section weighing less than two pounds. “He was so small, it was almost surreal,” said his Dad Patrick. Baby Finn spent the first 92 days of his life in the Neonatal Intensive Care Unit.

Today, Finn’s developmental growth is right on track!
Christian’s story: Changing the odds against leukemia

Christian Bass was just 9 months old when he was diagnosed with leukemia. “When a child is diagnosed with cancer, it’s like a bomb going off in the room,” said Bruce Camitta, MD. “Their world is crumbled.” Through new treatments and protocols, survival rates are improving. The MACC Fund Center for Cancer and Blood Disorders helps families like Christian’s through this hard time.

Lucas’ story: Healing a tiny heart

No parent ever wants to hear their newborn baby has a hole in his heart. Amy and Brian Randall faced this difficult diagnosis when their son Lucas was found to have a congenital heart defect and underwent open-heart surgery at the Herma Heart Center. “It was the hardest thing having to give my baby to the surgeons, and knowing there was nothing more I could do for him,” said Amy.
